Chapter 4. Power from protons. It is arguably the most fleshed-out story of how life began. This story is now regarded as one of the leading hypotheses for the origin of life Thanks to Kelley, they now knew that the rocks of alkaline vents were porous: they were pocked with tiny holes filled with water.

### **BBC - Earth - The secret of how life on Earth began**

How Did Life Begin? What are the origins of life? How did things go from non-living to living? From something that could not reproduce to something that could? One person who has exhaustively ...

No answers today, only a question. But it's one of the most interesting and meaningful questions we can possibly ask. Where does life come from? How did we get from no life on Earth, to the rich ...

### **How Did Life Begin? - Universe Today**

Abiogenesis. Abiogenesis, or informally the origin of life, is the natural process by which life arises from non-living matter, such as simple organic compounds. The transition from non-living to living entities was not a single event, but a gradual process of increasing complexity and without external direction,...

### **Abiogenesis - Wikipedia**

Timeline of the evolutionary history of life. The similarities between all present day organisms indicate the presence of a common ancestor from which all known species, living and extinct, have diverged through the process of evolution. More than 99 percent of all species, amounting to over five billion species,...
