Welcome to Planets for Kids I really hope you enjoy the information that I have provided on this website. You will find lots of information about our solar system with lots of questions and answers and games for you to play.

Planets For Kids - Solar System Facts and Astronomy

The reference average distance from Sun to Earth is defined as one astronomical unit, AU. Per this reference, Mars averages slightly more than 1.5 AU from the Sun; Saturn averages almost 10 AU; and Neptune about 30 AU (see chart below) . Lines of apsides. The chart shows the extreme range—from the closest approach (perihelion) to farthest point (aphelion)—of several orbiting celestial ...

The five brightest planets - Mercury, Venus, Mars, Jupiter and Saturn - have been known since ancient times and can easily be seen with the naked eye if one knows when and where to look. They are visible for much of the year, except for short periods of time when they are too close to the Sun to observe. All of the planets will not normally be visible on a single night, however.
