Such dramatic demographic shifts have wide ranging implications, and few are more fiercely felt by residents of megacities than air quality. Most of the world's megacities are located in poor, developing countries, and do not have adequate financial resources and air quality management plans that cities like London and Los Angeles have implemented to curb air pollution.

The periodic table, also known as the periodic table of elements, is a tabular display of the chemical elements, which are arranged by atomic number, electron configuration, and recurring chemical properties. The structure of the table shows periodic trends. The seven rows of the table, called periods, generally have metals on the left and non-metals on the right.
