The newest form of prenatal testing for Down syndrome is regularly referred to as testing cell free fetal DNA. At the recent American College of Medical Genetics (ACMG) annual meeting it was made clear that, in fact, what is mostly being tested is placental DNA. Perhaps using precise language would make clear that NIPT remains a highly accurate screening test, not a diagnostic test, since it ...

In common usage, the word "human" generally refers to the only extant species of the genus Homo—anatomically and behaviorally modern Homo sapiens.. In scientific terms, the meanings of "hominid" and "hominin" have changed during the recent decades with advances in the discovery and study of the fossil ancestors of modern humans. The previously clear boundary between humans and apes has ...
