In this lesson, students learn about organism interactions and how those interactions shift in response to climate change, especially in grassland communities.

Simulating Climate Change Research in Grasslands

A large number of ancient mass extinction events have been strongly linked to global climate change. Because current climate change is so rapid, the way species typically adapt (eg - migration) is, in most cases, simply not be possible. Global change is simply too pervasive and occurring too rapidly.

Can animals and plants adapt to global warming?

People. An organization's most important resource is its people. They bring the ideas, skills, and human-power to drive change. Whether visionaries, technicians, or work-horses, we help organizations get the most out of their teams, relationships, and networks to achieve optimal performance

Recently, several studies have been conducted to characterize the presence of microplastics in the Great Lakes. Plastics with diameters <5 mm were collected from sediments and beaches in Lake Ontario, in the Humber Bay region which receives inputs from Toronto via the Humber River (Corcoran et al., 2015). Over 4000 plastic pellets were collected during three sampling events in 2013, and these ...

1. Introduction. In the field of management of technology and innovation, the ecosystem concept is of increasing significance (Adner and Kapoor, 2010, Kapoor and Lee, 2013, Meyer et al., 2005, Pierce, 2009, Teece, 2007), although the term ecosystem seems to be used without clear definition or sound theoretical backing. This paper poses three basic questions at the start of the review process.
