Also called the A108 Octal Voice and Data Card, this is an active ISDN card, capable of handling most of the ISDN connection protocols, such as dialing and accepting calls, through the use of dedicated microprocessors and firmware, which is efficient when many channels see heavy use. With passive ISDN cards, these tasks are instead performed by PC software.

The General Radiotelephone Operator License (GROL) is a license granted by the U.S. Federal Communications Commission (FCC). The GROL does not convey the authority to operate an amateur radio station, for which the FCC has a separate licensing system, nor is it required for any engineering jobs in radio and television broadcasting. However, some services such as aviation, marine and ...
