In general, a cone is a pyramid with a circular cross section. A right cone is a cone with its vertex above the center of its base. However, when used without qualification, the term "cone" often means "right cone." In discussions of conic sections, the word "cone" is taken to mean "double cone," i.e., two cones placed apex to apex. The double cone is a quadratic surface, and each single cone ...

An ellipse is a curve that is the locus of all points in the plane the sum of whose distances  $r_1$  and  $r_2$  from two fixed points  $F_1$  and  $F_2$  (the foci) separated by a distance of  $2c$  is a given positive constant  $2a$  (Hilbert and Cohn-Vossen 1999, p. 2). This results in the two-center bipolar coordinate equation  $r_1 + r_2 = 2a$ , (1) where  $a$  is the semimajor axis and the origin of the coordinate system ...

### **Ellipse -- from Wolfram MathWorld**

Would you like to know everything about mathematics?. Do you think that is impossible? It isn't if you are willing to read and study many books and videos. You can't learn everything from formal school class lectures - they can't allow time for the information to be completely absorbed.

A natural setting for problem of Apollonius is inversive geometry. The basic strategy of inversive methods is to transform a given Apollonius problem into another Apollonius problem that is simpler to solve; the solutions to the original problem are found from the solutions of the transformed problem by undoing the transformation.

1 MATHEMATICS (CLASSES XI -XII) General Guidelines (i) All concepts/identities must be illustrated by situational examples. (ii) The language of 'word problems' must be clear, simple and unambiguous.

### **MATHEMATICS (CLASSES XI -XII)**

In mathematics, two varying quantities are said to be in a relation of proportionality, if they are multiplicatively connected to a constant, that is, when either their ratio or their product yields a constant. The value of this constant is called the coefficient of proportionality or proportionality constant.. If the ratio ( $y / x$ ) of two variables ( $x$  and  $y$ ) is equal to a constant ( $c = y / x \dots$
