Special relativity is a theory of the structure of spacetime. It was introduced in Einstein's 1905 paper "On the Electrodynamics of Moving Bodies" (for the contributions of many other physicists see History of special relativity). Special relativity is based on two postulates which are contradictory in classical mechanics: . The laws of physics are the same for all observers in uniform motion ...

1. Introduction. The increasing significance of shale gas plays has lead to the need for deeper understanding of shale behaviour. Shale gas has been produced for many years in the U.S.A. and forms around 8% of total natural gas production (Warlick, 2006). Gas shales in the USA are predicted to become the source of 45% of all gas production by 2035, especially considering that other fossil ...
