The Strata-sphere has found that surface temperature measurements fail to show twentieth century global warming. The raw CRU data released in Climategate shows that surface temperature readings measure the first half of the last century (1900-1960) as warm or warmer than it is today.

Climategate | Watts Up With That?

Science may well give us good things. We all know Velcro came from NASA. But why bother spending all this money exploring space and finding out there was water on Mars at some point in the last few thousand years (we have water in Earth) when these same great minds could be applied to finding better ways to power humanity's insatiable desire for energy, to feeding the starving millions around ...
