Human papillomavirus, or HPV, is the most common sexually transmitted infection (STI) in the United States. About 80% of women will get at least one type of HPV at some point in their lifetime. 1 It is usually spread through vaginal, oral, or anal sex. Many women do not know they have HPV, because it usually has no symptoms and usually goes away on its own.

Health provision varies around the world. Almost all wealthy nations provide universal health care (the US is an exception). Health provision is challenging due to the costs required as well as various social, cultural, political and economic conditions.

Health Care Around the World — Global Issues

By the end of elementary school, students should know that by breathing, people take in the oxygen they need to live. This basic knowledge allows middle-school students to develop a more sophisticated understanding of how respiration works in terms of basic macroscopic (e.g., major organs involved) and microscopic (e.g., cellular) processes involved with breathing.
