Why Foods Cause Heart Palpitations. Feeling palpitations after eating is a relatively common experience, which tends to occur when a substance in your food or drink—or your body's natural biochemical response to that substance—jolts the heart's electrical system and causes fluttering sensations, skipped beats, or a feeling that your heart is beating too hard or too fast.

A router is a networking device that forwards data packets between computer networks. Routers perform the traffic directing functions on the Internet. Data sent through the internet, such as a web page or email, is in the form of data packets. A packet is typically forwarded from one router to another router through the networks that constitute an internetwork (e.g. the Internet) until it reaches ...

Environmental exposures, including those at work, may increase the risk of developing asthma or making asthma symptoms worse. Exposure to cigarette smoke during pregnancy or in a child's first few years increases the risk of the child developing asthma symptoms early in life. This exposure also may affect lung growth and development.
