Geothermal energy (from the Greek roots geo, meaning earth, and from thermos, meaning heat) is energy made by heat inside the Earth's crust.. Although the Sun does heat the surface of the Earth, the heat from inside the Earth is not caused by the Sun. The geothermal energy of the Earth's crust comes 20% from the original formation of the planet, and 80% from the radioactive decay of minerals.

Text mining is an emerging topic that advances the review of academic literature. This paper presents a preliminary study on how to review solar irradiance and photovoltaic (PV) power forecasting (both topics combined as “solar forecasting” for short) using text mining, which serves as the first part of a forthcoming series of text mining applications in solar forecasting.

### **History and trends in solar irradiance and PV power ...**

remember world war i? trench warfare, machine guns blazing, troops leaping from trenches into barbed wire... we likely don't recall the conflict on the home front, that montana sent more troops per capita than any state, or that at the end of the war, the middle east was carved up by the winners, interested in oil.
