We present a comprehensive global shipping emission inventory and the global activities of ships for the year 2015. The emissions were evaluated using the Ship Traffic Emission Assessment Model (STEAM3), which uses Automatic Identification System data to describe the traffic activities of ships.

Global assessment of shipping emissions in 2015 on a high ...

The procedure described in step 1 assumes a good fit between demand and supply at the NUTS-3 level. While that correlation cannot be assessed at that level with available data, the NUTS-2 level data indicates a strong positive correlation of 0.88 between total nights spent and accommodation capacity measured as the available number of bed-places.

x Given the structural changes associated with the progression of Osteoarthritis (OA), we hypothesized that patterns of through-thickness, large-strain shear evolve with early-stage OA. We therefore aimed to determine whether and how patterns of shear strains change during early-stage OA to 1) gain insight into the progression of OA by quantifying changes in local deformations; 2) gauge the ...
