Invertebrate Classification Answer Sheet

Vertebrate or Invertebrate? Answer Key. Instructions: Scientists group animals by how they are alike. Animals can be placed into one of two main groups: vertebrates or invertebrates. Vertebrates are animals with backbones. Invertebrates are animals that do not have backbones. Decide if each animal is a vertebrate or invertebrate.

Vertebrate or Invertebrate? Answer Key - HelpTeaching.com

Chapter 33 Invertebrates Lecture Outline . Overview: Life Without a Backbone. Invertebrates—animals without a backbone—account for 95% of known animal species and all but one of the roughly 35 animal phyla that have been described.

Chapter 33 - Invertebrates | CourseNotes

piers began to collapse. The culprit was a marine invertebrate called the shipworm. Like a termite, the shipworm lives in wood and tunnels through it. Not surprisingly, shipworms prefer wood that is not soaked with pollutants. The return of the shipworm to cleaner harbors has prompted officials to use pilings made of recycled plastic.
