Test the pH of things like coffee, spit, and soap to determine whether each is acidic, basic, or neutral. Visualize the relative number of hydroxide ions and hydronium ions in solution. Switch between logarithmic and linear scales. Investigate whether changing the volume or diluting with water affects the pH. Or you can design your own liquid!

In total there are 11 guided reading lesson plans, covering each of the chapters in the book. Each plan contains a 'reading and responding to the text' activity which is designed to be completed with the class teacher with the reading group. There are then follow up independent activities which the children can then complete during the remainder of the week.
