Sterngold: Dental Attachments & Mini Dental Implants

A dental implant (also known as an endosseous implant or fixture) is a surgical component that interfaces with the bone of the jaw or skull to support a dental prosthesis such as a crown, bridge, denture, facial prosthesis or to act as an orthodontic anchor. The basis for modern dental implants is a biologic process called osseointegration, in which materials such as titanium form an intimate ...

Dental implant - Wikipedia

Tapered Internal dental implants provide excellent primary stability, maximum bone maintenance and soft tissue attachment for optimal aesthetics. Currently our number one dental implant, the Tapered Internal achieves these benefits from its anatomically tapered dental implant body, aggressive buttress threads and advanced Laser-Lok surface technology.
