THE HUMAN BODY SYSTEMS - Winston-Salem/Forsyth County Schools

While the adult human skeletal system includes 206 bones, the infantile skeletal system has many more, since not all of the bones have fused together yet. When humans moved into permanent settlements to farm, the human skeletal system weakened from the lack of rigorous exercise required for nomadic hunting and gathering.

human skeleton | Parts, Functions, Diagram, & Facts ...

The skeletal system supports and protects the body while giving it shape and form. This system is composed of connective tissues including bone, cartilage, tendons, and ligaments. Nutrients are provided to this system through blood vessels that are contained within canals in bone. The skeletal system stores minerals, fats, and produces blood cells.
