This course is designed to provide an overview on epidemiology and the Internet for medical and health related students around the world based on the concept of Global Health Network University and Hypertext Comic Books.

Supercourse: Epidemiology, the Internet, and Global Health

Neglected tropical diseases (NTDs) are a diverse group of tropical infections which are common in low-income populations in developing regions of Africa, Asia, and the Americas. They are caused by a variety of pathogens such as viruses, bacteria, protozoa and helminths. These diseases are contrasted with the big three infectious diseases (HIV/AIDS, tuberculosis, and malaria), which generally ...

Neglected tropical diseases - Wikipedia

Tuberculosis (TB) is an infectious disease usually caused by *Mycobacterium tuberculosis* (MTB) bacteria. Tuberculosis generally affects the lungs, but can also affect other parts of the body. Most infections do not have symptoms, in which case it is known as latent tuberculosis. About 10% of latent infections progress to active disease which, if left untreated, kills about half of those affected.

Tuberculosis - Wikipedia

Introduction. Feline infectious peritonitis (FIP) is a coronaviral disease that can affect cats of any age, but is most prevalent among cats <3 years of age and especially from 4 to 16 months of age (Pedersen, 2009). FIP occurs commonly in catteries (pedigreed cats), shelters, kitten foster/rescue facilities and dense free-roaming colonies.

Part 1: Global epidemiology of antibiotic resistance and use The rise of resistance. The decreasing effectiveness of antibiotics in treating common infections has quickened in recent years, and with the arrival of untreatable strains of carbapenem-resistant Enterobacteriaceae, we are at the dawn of a postantibiotic era. 1 In high-income countries, continued high rates of antibiotic use in ...
