In recent years, semiconductor photocatalytic process has shown a great potential as a low-cost, environmental friendly and sustainable treatment technology to align with the “zero” waste scheme in the water/wastewater industry. The ability of this advanced oxidation technology has been widely demonstrated to remove persistent organic compounds and microorganisms in water.

In probability theory, the multi-armed bandit problem (sometimes called the K-or N-armed bandit problem) is a problem in which a fixed limited set of resources must be allocated between competing (alternative) choices in a way that maximizes their expected gain, when each choice's properties are only partially known at the time of allocation, and may become better understood as time passes or ...

Introduction. Lignocellulosic biomass is a cost-effective and environment-friendly alternative energy source, as compared to fossil fuels which are non-renewable and contribute to greenhouse gas emissions and global warming , . The use of lignocellulosic biomass for bioenergy generation has the potential to mitigate fossil fuel depletion and reduce dependency on fossil fuels.
