In law and economics, the Coase theorem (/ ˈ k oʊ s /) describes the economic efficiency of an economic allocation or outcome in the presence of externalities. The theorem states that if trade in an externality is possible and there are sufficiently low transaction costs, bargaining will lead to a Pareto efficient outcome regardless of the initial allocation of property.

The median voter theorem states that "a majority rule voting system will select the outcome most preferred by the median voter".. The median voter theorem rests on two main assumptions, with several others detailed below. The theorem is assuming that voters can place all alternatives along a one-dimensional political spectrum. It seems plausible that voters could do this if they can clearly ...
