Q: Why Do Beaver Modify their Habitat? A: Beavers move poorly when out of water. To compensate, they create a water-surrounded world to protect themselves from terrestrial predators and to stay close to their food source. Security and easy access to various food plants close to water's edge are made possible by the beaver dam. Created to raise the water to the level which best suits the ...

If you need SSL you need privacy and verification — the -k flag means you're losing verification. Depending on your needs this may be acceptable. MITM are non-trivial attacks if you assume your network and the server you're communicating with are secured from interlopers (can you make that assumption?).
