It is your agreed own grow old to operate reviewing habit. along with guides you could enjoy now is hardest easy geometry problem answer below.

Hardest Easy Geometry Problem Answer

Best Answer: Cosine is the ratio of the side lengths in a triangle. If the triangle is dilated by a factor of two, the sides would double but all angles would be the same. So you are taking the cosine of the same angle which would be $\frac{8}{17}$. Another way to think about it would be to multiply each side in the ...
