Learning is the process of acquiring new, or modifying existing, knowledge, behaviors, skills, values, or preferences. The ability to learn is possessed by humans, animals, and some machines; there is also evidence for some kind of learning in some plants. Some learning is immediate, induced by a single event (e.g. being burned by a hot stove), but much skill and knowledge accumulates from ...

The mind (not to be confused with the brain) is a set of cognitive faculties including consciousness, imagination, perception, thinking, judgement, language and memory. It is usually defined as the faculty of an entity's thoughts and consciousness. It holds the power of imagination, recognition, and appreciation, and is responsible for processing feelings and emotions, resulting in attitudes ...

Abstract. Through a longitudinal study of a construction firm in the Middle East, we show that the systematic approach of maturity models for identifying and implementing improvement actions can increase the effectiveness and comprehensiveness of improvement efforts in a business culture perceived to be resistant to western-style management solutions.

Study of Organizational Change Management - Maturity Models

The study of physiology and biological processes has played a significant role in psychology since its earliest beginnings. It was Charles Darwin who first introduced the idea that evolution and genetics play a role in human behavior.

What is smart future? The concept of “smart” has many different perspectives. In this paper, our concept of smart is about being intelligent, proactive, purposeful, aspirational, and goal-oriented in applying innovative ideas to achieve a desired future (Smart Future Initiative, 2016). Creating a smart future is much more than just being future smart where people prepare for the possible ...
