Genome editing, or genome engineering, is a type of genetic engineering in which DNA is inserted, deleted, modified or replaced in the genome of a living organism. Unlike early genetic engineering techniques that randomly inserts genetic material into a host genome, genome editing targets the insertions to site specific locations.. In 2018, the common methods for such editing use engineered ...

Cells as Interactome Networks. Systems biology can be said to have originated more than half a century ago, when a few pioneers initially formulated a theoretical framework according to which multiscale dynamic complex systems formed by interacting macromolecules could underlie cellular behavior (Vidal, 2009). These theoretical systems biology ideas were elaborated upon at a time when there was ...
