I am using SPSS software for years and do not have any problems. I did not find STATA any more helpful except manual entering in some parts; however, I have not worked with R yet.

What is the difference between SPSS, R and STATA software?

Method overriding, in object-oriented programming, is a language feature that allows a subclass or child class to provide a specific implementation of a method that is already provided by one of its superclasses or parent classes. The implementation in the subclass overrides (replaces) the implementation in the superclass by providing a method that has same name, same parameters or signature ...
