Brenda- I'm afraid I can't comment on your lab results due to liability. I can tell you that while reference ranges of what's "normal" may vary depending on the lab that produces the test reports, most thyroid patients feel best with a TSH between 0.5-2, and with Free T3 and Free T4 in the top half of the reference range.

We know that Hashimoto's and other autoimmune conditions develop due to three things. Genetic predisposition is one of those. The other two, intestinal permeability and autoimmune triggers, must also be present, and they are – thankfully – things we can actually address and improve upon through lifestyle interventions.
