Graph API Paging explains that the response would contain a field @odata.nextLink which would contain a skiptoken pointing to the next page of contents.. When I test the API, I'm getting a fully-qualified MS Graph URL which contains the skiptoken as a query param. E.g. Below is the value I got for the field @odata.nextLink in the response JSON.

I'm going to tell you the weirdest and, yet, most obviously true thing you've ever heard: You're not a person. This is going to sound like some real Rust Cohle s\*\*t, but bear with me because deep down you already know all of this.. For instance, you already know that you are, to a certain degree, a product of your genes -- they go a long way toward determining if you would be physically ...

1. Sets, Bags, and Sequences. Elementary or "naive" set theory is used to define basic mathematical structures. A set is an arbitrary collection of elements, which may be real or imaginary, physical or abstract. In mathematics, sets are usually composed of abstract things like numbers and points, but one can also talk about sets of apples, oranges, people, or canaries.
