[Download File PDF](#)

*Graham Laws Problems With Answers - As recognized, adventure as well as experience practically lesson, amusement, as competently as concord can be gotten by just checking out a books graham laws problems with answers also it is not directly done, you could say you will even more almost this life, roughly the world.*

*We meet the expense of you this proper as well as simple habit to get those all. We come up with the money for graham laws problems with answers and numerous ebook collections from fictions to scientific research in any way. among them is this graham laws problems with answers that can be your partner.*

Title: Microsoft Word - Grahams Law Worksheet Answers.docx Author: Good, Brian Created Date: 10/29/2013 2:52:33 PM

### **Graham's Law (Worksheet) ( Answer Key**

Problem #2: What is the molecular weight of a gas which diffuses 1/50 as fast as hydrogen?

Solution: Set rate 1 = other gas = 1 Set rate 2 = H<sub>2</sub> = 50 . The molecular weight of H<sub>2</sub> = 2.02 The molecular weight of the other gas = x. By Graham's Law (see the answer to question #1), we have:

### **ChemTeam: Graham's Law: Probs 1-10**

Different gases diffuse at different rates, depending on their molar masses. You can compare the rates at which two gases diffuse using Graham's law. Graham's law also applies to effusion, the process in which gas molecules flow through a small hole in a container. Diffusion is the movement of a substance from an area of [...]

Chemistry: Graham's Law Do the following problems, showing your work and including all proper units. 1. If neon gas travels at 400 m/s at a given temperature, calculate the velocity of butane, C<sub>4</sub>H<sub>10</sub>, at the same temperature. 2. Hydrogen sulfide, H<sub>2</sub>S, has a very strong rotten egg odor. Methyl salicylate, C<sub>8</sub>H<sub>8</sub>O<sub>3</sub>, has a wintergreen odor,

Problem #24b: Calculate the ratio of effusion rates for U-238 F<sub>6</sub> and U-235 F<sub>6</sub>. Express your answer using five significant figures and as the following ratio: rate U-238 F<sub>6</sub> / rate U-235 F<sub>6</sub>. Solution: Specifying the form of the ratio forces the numbers to be placed in certain places in Graham's law The U-238 values MUST be associated with r<sub>1</sub> ...

### **ChemTeam: Graham's Law: Probs 11-25**

Graham's law may only be used to compare the rate of diffusion or effusion of gases at a constant temperature. The law breaks down, like other gas laws, when the concentration of gases becomes very high. The gas laws were written for ideal gases, which are at low temperatures and pressures.
