Prostate specific antigen (PSA) is a protein produced primarily by cells in the prostate, a small gland that encircles the urethra in males and produces a fluid that makes up part of semen. Most of the PSA that the prostate produces is released into this fluid, but small amounts of it are also released into the bloodstream.

Screening tests are an important part of your preventive health care. The tests can be used for early detection of some of the more common and potentially deadly diseases, such as cancers, diabetes, and heart disease. These tests can find certain illnesses in their earliest and most curable stages, even before you notice symptoms.
