The Columbian exchange, also known as the Columbian interchange, named for Christopher Columbus, was the widespread transfer of plants, animals, culture, human populations, technology, diseases, and ideas between the Americas, West Africa, and the Old World in the 15th and 16th centuries. It also relates to European colonization and trade following Christopher Columbus's 1492 voyage.

Network Science by Albert-László Barabási

In the semiotic theories of Jakob von Uexküll and Thomas A. Sebeok, Umwelt (plural: umwelten; from the German Umwelt meaning "environment" or "surroundings") is the "biological foundations that lie at the very epicenter of the study of both communication and signification in the human [and non-human] animal". The term is usually translated as "self-centered world".

A number of important diseases are transmitted between domesticated animals and thence to humans. Vaccination of domesticated animals has the potential to protect humans against these zoonoses, either indirectly by interrupting transmission where domesticated animals are amplifying hosts in the transmission cycle or directly by preventing spread from infected animals to humans.

Vaccines against diseases transmitted from animals to ...

Introduction. Maintaining or improving soil health is essential for sustainable and productive agriculture. 'Healthy' soil will help to push sustainable agricultural productivity close to the limits set by soil type and climate. Key aspects of 'healthy' soil include the following:
