By analyzing the human antibody repertoire in terms of structure, amino acid sequence diversity and germline usage, we found that seven V H and seven V L (four V_k and three V_λ) germline families cover more than 95 % of the human antibody diversity used. A consensus sequence was derived for each family and optimized for expression in Escherichia coli. ...

In physics, spacetime is any mathematical model that fuses the three dimensions of space and the one dimension of time into a single four-dimensional continuum. Spacetime diagrams can be used to visualize relativistic effects such as why different observers perceive where and when events occur differently.. Until the turn of the 20th century, the assumption had been that the three-dimensional ...
