Get an answer for 'Find  $\frac{dy}{dx}$  for  $\cos(y^2) + x = e^y$ ' and find homework help for other Math questions at eNotes

### Find $\frac{dy}{dx}$ for $\cos(y^2) + x = e^y$ | eNotes

Come here for homework help in most any field. We will not do it for you, but we can give you hints. ... The problem says "Use implicit differentiation to find an equation of the tangent line to the curve at the given point:  $x^2 + 2xy + 4y^2 = 12$ ,  $(2, 1)$ , (Ellipse)"

### [Intro Calculus] Implicit differentiation : HomeworkHelp

**\*\*NOINLINE\*\***Implicit differentiation is a way of differentiating a function that is written in terms of two or more variables, such as  $f(x, y)$ , and cannot be solved explicitly in terms of one variable. It is a special case of the chain rule, where the differential involves multiple variables, rather than just one.

### AP Calculus Implicit Differentiation and Other Derivatives ...

This is a quick reference for implicit differentiation. UC Davis also seems to have a page with some examples. But this doesn't even seem like an implicit problem. There is no difficulty in taking the derivative of  $y$  in terms of  $x$ , or in solving for  $y$  in terms of  $x$ . It seems more like a related rate / chain rule problem.
