Almost all beef cattle entering feedlots in the United States are given hormone implants to promote faster growth. The first product used for this purpose DES (diethylstilbestrol) was approved for use in beef cattle in 1954. An estimated two-thirds of the nation's beef cattle were treated with DES in 1956 (Marcus, 1994, cited in Swan et al., 2007).

Growth Hormones Fed to Beef Cattle Damage Human Health

Developmental psychology is the scientific study of how and why human beings change over the course of their life. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life.

Developmental psychology - Wikipedia

Growth hormone (GH) or somatotropin, also known as human growth hormone (hGH or HGH) in its human form, is a peptide hormone that stimulates growth, cell reproduction, and cell regeneration in humans and other animals. It is thus important in human development. GH also stimulates production of IGF-1 and raises the concentration of glucose and free fatty acids.
