Steps for Graphing Linear Inequalities. Graph a solid line if the inequality is greater than or equal to or less than or equal to. Substitute an ordered pair to determine which side of the line to shade. (0,0) is the easiest ordered pair to choose, if it is not on the line. Shade the side of the line that contains all of the solutions to the inequality.

Graphing Linear Inequalities. We can do this a number of ways, either by plugging in x values and obtaining their corresponding y values, or we could use the slope and y intercept in the inequality. Let's plot the y intercept and use the slope to form the line. we can see that $b = 3$, so the y intercept will be (0,3) .
