there is actually 7 sometimes even 9. #8 and 9 are questionable but 8 is domain and 9 is life. the rest of them are starting from 7, kingdom, phylum, class, order, family, genus, species.

What are the 6 steps of classification - answers.com

Kingdom Monera has been classified into two groups - Archaeobacteria and Eubacteria. Archaeobacteria are microbes that live in extreme and harsh conditions, they are known as extremophiles. These bacteria lack cell wall, their cell membrane is made up of different lipids, and their ribosomes are similar to that of eukaryotes.

Kingdom Monera | Characteristics, Classification of ...

If the cell contains peptidoglycan but contains no nucleus, the cell is a bacteria, and therefore belongs in either kingdom eubacteria or kingdom archaeobacteria.

What kingdom has a nucleus - answers.com

Classified information in the United Kingdom is a system used to protect information from intentional or inadvertent release to unauthorised readers. The system is organised by the Cabinet Office and is implemented throughout central and local government and critical national infrastructure. The system is also used by private sector bodies that provide services to the public sector.

Classified information in the United Kingdom - Wikipedia

Animal classification is the categorizing of animals and organisms hierarchically.. The ranking system is based on a fixed number of levels such as kingdom, family, or genus. The order goes: Animal classification is based on an organisms descent from a common ancestor.

Animal Classification - Biology | Socratic

Animal Classification In order for us to understand how all living organisms are related, they are arranged into different groups. The more features that a group of animals share, the more specific the group is. Animals are given scientific names so that people all around the world can communicate about animals, no matter what language they speak (these names are traditionally Latin words).
