Making an ICE Chart An Aid in Solving Equilibrium Problems. An useful tool in solving equilibrium problems is an ICE chart. "I" stands for the initial concentrations (or pressures) for each species in the reaction mixture. "C" represents the change in the concentrations (or pressures) for each species as the system moves towards equilibrium.

Sample Problems This module is intended to give you some practice with ICE Tables. Select below whether you want to work a Stoichiometry or Equilibrium problem using ICE Tables.

**ICE Tables: Sample Problems**

Using an ICE table in equilibrium problems is similar to using one in stoichiometry problems, but with two important differences: Concentrations (or pressures for solely gas phase equilibria) are used instead of moles. Since equilibrium reactions never produce solely reactants or products, some of the information in the table may be unknown and ...
