Question answering (QA) is a computer science discipline within the fields of information retrieval and natural language processing (NLP), which is concerned with building systems that automatically answer questions posed by humans in a natural language.

### **Question answering - Wikipedia**

A question is an utterance which typically functions as a request for information. Questions can thus be understood as a kind of illocutionary act in the field of pragmatics or as special kinds of propositions in frameworks of formal semantics such as alternative semantics or inquisitive semantics. The information requested is expected to be provided in the form of an answer.

### **Question - Wikipedia**

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.

1 This is the definition that I stated off-the-cuff in response to a question by a science education student a few years ago. It's remarkably close to the one that later appeared in E.O. Wilson's Consilience.. 2 Quotation from one of his classes by Dr. Sheldon Gottlieb in the University of South Alabama webpage listed below.. 3 Few modern people will accept traditional lifestyles from ...

### **What is Science?**

What is an essential question? An essential question is – well, essential: important, vital, at the heart of the matter – the essence of the issue. Think of questions in your life that fit this definition – but don't just yet think about it like a teacher; consider the question as a thoughtful adult.
