Maxwell's equations are a set of coupled partial differential equations that, together with the Lorentz force law, form the foundation of classical electromagnetism, classical optics, and electric circuits. The equations provide a mathematical model for electric, optical, and radio technologies, such as power generation, electric motors, wireless communication, lenses, radar etc. Maxwell's ...

In electromagnetism and applications, an inhomogeneous electromagnetic wave equation, or nonhomogeneous electromagnetic wave equation, is one of a set of wave equations describing the propagation of electromagnetic waves generated by nonzero source charges and currents. The source terms in the wave equations makes the partial differential equations inhomogeneous, if the source terms are zero ...

In fisica il campo elettromagnetico è un campo tensoriale responsabile dell'interazione elettromagnetica, una delle quattro interazioni fondamentali.. È costituito dalla combinazione del campo elettrico e del campo magnetico, è generato localmente da qualunque distribuzione di carica elettrica variabile nel tempo e si propaga nello spazio sotto forma di onde elettromagnetiche.

Les solutions générales et causales des équations de Maxwell sont données par les équations de Jefimenko. Ces équations sont la généralisation, dépendant du temps (électrodynamique), de la loi de Coulomb et de la loi de Biot-Savart, qui étaient à l'origine vraies uniquement pour les champs en électrostatique et en magnétostatique ainsi que pour les courants continus.

Cenni storici. Le equazioni appaiono per la prima volta al completo ed in forma differenziale nel testo "A Dynamical Theory of the Electromagnetic Field", pubblicato da James Clerk Maxwell nel 1865, mentre la notazione moderna più comune fu sviluppata da Oliver Heaviside.La formulazione delle equazioni di Maxwell ha definito in modo completo il legame tra campo elettrico e campo magnetico ...

History of Tesla's Wireless Energy The fateful decision in 1905 by J. P. Morgan to abandon Tesla's Warden-clyffe Tower project on Long Island (after investing \$150,000), was a result of learning that it would be designed mainly for wireless transmission of electrical power, rather than telegraphy.
