Classical electromagnetism or classical electrodynamics is a branch of theoretical physics that studies the interactions between electric charges and currents using an extension of the classical Newtonian model. The theory provides a description of electromagnetic phenomena whenever the relevant length scales and field strengths are large enough that quantum mechanical effects are negligible.

It so often happens that I receive mail - well-intended but totally useless - by amateur physicists who believe to have solved the world. They believe this, only because they understand totally nothing about the real way problems are solved in Modern Physics.

Descrizione. La legge di Faraday descrive il manifestarsi di due fenomeni distinti: la forza elettromotrice dovuta alla forza di Lorentz che si manifesta a causa del moto di una spira in un campo magnetico, e la forza elettromotrice causata dal campo elettrico generato dalla variazione di flusso del campo magnetico, in accordo con le equazioni di Maxwell.

Magnetização. Na presença de uma excitação magnética →, os vários momentos magnéticos eletrônicos ou nucleares - ou seja, o dipolos atômicos - vão dividir-se em diferentes orientações segundo os níveis de energia que lhe sejam mais convenientes. A forma como a matéria responde à estimulação magnética depende entretanto não apenas do comportamento individual destes dipolos ...

A permeabilidade magnética mensura o campo magnético no interior de um material - devido ao campo magnetizante  $\rightarrow$  pré-existente na região onde o material é colocado bem como à magnetização por este induzida no material - em relação ao próprio campo magnetizante  $\rightarrow$  em questão.. Ao colocar o material no local considerado, no interior deste material verifica-se a presença de um ...

In matematica e fisica, il teorema di Helmholtz, anche detto teorema fondamentale del calcolo vettoriale o decomposizione di Helmholtz, il cui nome è dovuto a Hermann von Helmholtz, afferma che un campo vettoriale sufficientemente regolare è completamente determinato quando sono noti la sua divergenza e il suo rotore in ogni punto del suo dominio. In tal caso esso può essere espresso come ...
