The Global Seismic Hazard Assessment Program was a multi-year project sponsored by the United Nations that assembled the first consistent worldwide map of earthquake zones.

Major Earthquake Zones Worldwide - ThoughtCo

Table 1 gives a schematic overview of the main data layers required for landslide susceptibility, hazard and risk assessment (indicated in the upper row of Fig. 1). These can be subdivided into four groups: landslide inventory data, environmental factors, triggering factors, and elements at risk (Van Westen et al., 2005). Of these, the landslide inventory is by far the most important, as it ...

Earthquake Risk. Earthquakes can occur everywhere in California which means all Californians live with an earthquake risk. In addition to the shaking caused by earthquakes, other things can occur such as landslides, surface fault ruptures and liquefaction--all of which may cause injury or property damage.
