Multiple-choice tests are arguably the most popular type of assessment in education, and much research has been dedicated to determining best practices for using them to measure learning.

Multiple-Choice Testing in Education: Are the Best ...
A similar question was asked a year ago and has numerous responses, including one regarding pixelizing the images, which I was going to suggest as at least a pre-qualification step (as it would exclude very non-similar images quite quickly).. There are also links there to still-earlier questions which have even more references and good answers. Here's an implementation using some of the ideas ...

python - Image comparison algorithm - Stack Overflow
Third Choice - Keypoints + Decision Trees. A third approach that is probably much faster than the other two is using semantic texton forests (PDF). This involves extracting simple keypoints and using a collection decision trees to classify the image.
