Introduction to Information Retrieval

Information retrieval (IR) is the activity of obtaining information system resources relevant to an information need from a collection. Searches can be based on full-text or other content-based indexing. Information retrieval is the science of searching for information in a document, searching for documents themselves, and also searching for metadata that describe data, and for databases of ...

Highlights We explore the project benefits of Building Information Modelling (BIM). We analyse 35 construction projects which report on the use of BIM. Cost reduction and control are the most commonly reported benefit. Time savings and enhanced communication are significant positive outcomes. Challenges from using BIM-related software produce negative benefits in some cases.
