Many factors go into the decision of how to classify certain data. These factors include the following: Value: Value is the number one criterion. Not all data has the same value. The home address and medical information of an employee is considerably more sensitive (valuable) than the name of the chief executive officer (CEO) and the main telephone number of the company.

Online learning can be an ideal way to combine education with work, family and other responsibilities. If you answer "yes" to the following questions, earning an online degree with M State may be right for you.

Online - M State
This document describes service-level management and service-level agreements (SLAs) for high-availability networks. It includes critical success factors for service-level management and performance indicators to help evaluate success. The document also provides significant detail for SLAs that follow best practice guidelines identified by the high availability service team.

Service Level Management: Best Practices White Paper - Cisco
I'm just going to include a little backstory here so I don't end up answering the same questions over and over. We'd been having internet issues in my house for a while, and I had always whittled it down to problems on my ISP's end; but we bought a new cable modem (Motorola Surfboard) and router (Cisco Linksys WRT110) anyways, as they both needed updating.
