Jeffrey D. Ullman --- Books - Stanford University
In computational complexity theory, P, also known as PTIME or DTIME(n O(1)), is a fundamental complexity class.It contains all decision problems that can be solved by a deterministic Turing machine using a polynomial amount of computation time, or polynomial time.. Cobham's thesis holds that P is the class of computational problems that are "efficiently solvable" or "tractable".

P (complexity) - Wikipedia
Computational complexity theory focuses on classifying computational problems according to their inherent difficulty, and relating these classes to each other. A computational problem is a task solved by a computer. A computation problem is solvable by mechanical application of mathematical steps, such as an algorithm.. A problem is regarded as inherently difficult if its solution requires ...
